10. Printing

No printing, transparent spokeguards.

Design nr.: _____ (Choose the number of the requested design from our catalogue or our website).

Designs starting with "B-" can only be chosen for our standard dimensions without cutouts

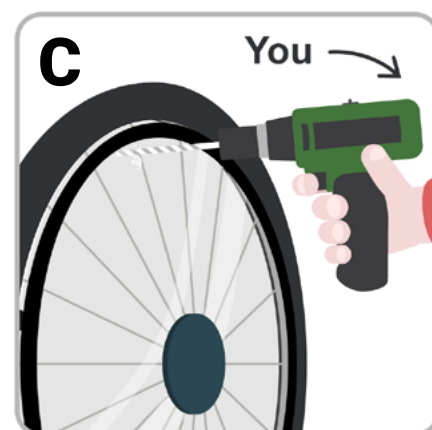

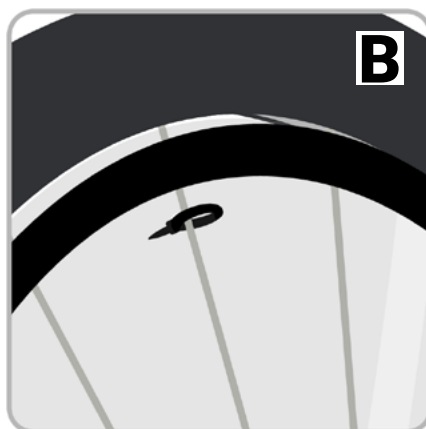

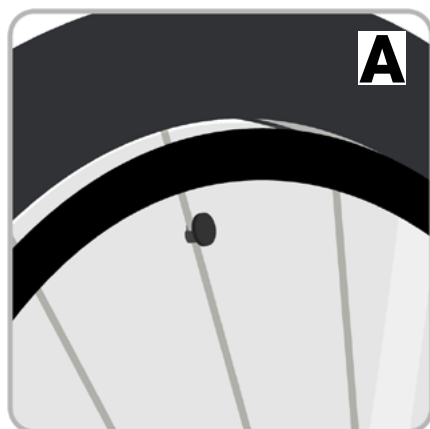

11. Mounting the spokeguard on your wheel

In order to mount the spokguard on your wheel spokenipples (A) or tyraps (B) can be used. Both (A & B) are included.

If your wheel contains a hub motor, you don't have to make this choice.

These spokeguards do have standard fixation holes.

Choose one of these options below to determine the mounting holes

(A) Spokeguards delivered with 3 mounting holes $\varnothing 9$ mm for nipples, only to be used with spokeguard without cutouts and wheels with 36, 24, 18 or 12 spokes.

(B) Spokeguards delivered with 3x 2 mounting holes $\varnothing 4$ mm for tyraps.

(C) Spokeguards delivered without any mounting holes, you will drill the mounting holes yourself.
